## Embedding Curriculum Careers

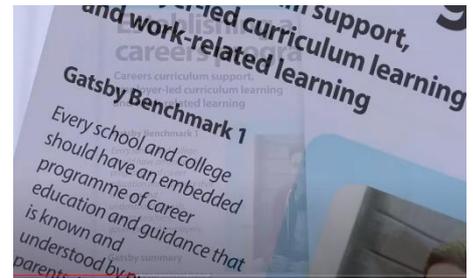

The intended audience for this document is **staff**.

**All students have an equal entitlement to high quality Careers Education, Information, Advice and Guidance at Laurus schools that helps to prepare them for choices and transitions affecting their future education, training and employment.**

### Laurus Trust - 7 Steps to Curriculum Careers

It is important you know why your curriculum is being delivered to ensure that all our learners are provided with the best platform of success to get into the careers or profession they desire. You can make you subject careers driven – put a focus onto why they need to know this and how it will help them in the future. Things you could do to make an impact:

1. Discuss pathways with your subject, and how it could be taken further at Post 16, degree level or through an apprenticeship, discussing the careers and jobs it could lead to.
2. Create a departmental “Careers” display to show routes, and progression in your subject (see example below)
3. Create a poster to show Courses and Apprenticeships in Your subject
4. Create a display in your room to show why your subject is vital for careers and the world of work
5. Invite a guest speaker from the one of our Local colleges or Universities to promote and raise aspirations
6. Invite a local Business employee/employer to discuss how they use your subject in your lesson
7. Arrange a visit to a workplace related to your subject area. Careers can be part of the focus. Note – We can help with arranging a guest speaker through our “Give an Hour” programme (see below) and support you with the Risk Assessment

#### The Gatsby Benchmark

“This will provide you with an understanding of the Gatsby Benchmarks for schools”

### Student Progression

Supporting the progression of pupils onto suitable post-16 and post-18 options is a team effort and it is important as a team of staff to work collaboratively for the benefit of our leavers. To this end, please find links to the various resources that you might require to support the young people in your various roles as Subject Teacher, Form Tutor and/or Learning Mentor. Parents please find resources that could support our team effort.

## Embedding Curriculum Careers

STAFF – Some website to consider

<http://www.thewowshow.co.uk/>

<https://www.lmiforall.org.uk/>

<https://www.bbc.com/bitesize/careers>

<https://learnliveuk.com/live-broadcasts/>

### Get a University Involved in your Subject

Why not hold a lecture in a one of your lessons – The University of Manchester are inviting schools to arrange a Guest Lecturer to come into the school to speak to students aiming to provide a platform to aspire to University. It's completely FREE and subject specific.

[Click here](#) to find out more.

#### Academic guest lecture series from The University of Manchester

Teachers of post-16 A-level students can book world-class academics from The University of Manchester to deliver guest lectures at local schools and colleges.

### How can I get started?

As a teacher/tutor just talking to your classes about futures is a great start. Discuss your career path, discuss family members and the roles they do. Speak to your Head of Department. What ideas have they built into the departmental development plan? You could create a simple display about careers in your subject area, or maybe a poster about where your subject can take you. Once students see the reason for a subject and the purpose behind it, this can be a great tool for motivation and progress.

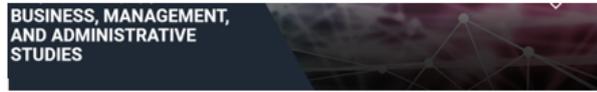

**i-could website**

"This website has lots of ideas and activities you could look into such as working with volunteers"
